PROFILE

I'm a passionate developer who has a good background in working on cloud platforms, website design and basic android development; using modern frameworks and technologies. I am a team player, catchy for detail, and able to learn new technologies quickly.

SKILLS

- Spring Boot, Express.js, Django
- Android Development(Basic)
- MongoDB, MySQL
- Linux, Git/Github
- JavaScript, Java, Python
- AWS, Azure
- Docker

EXPERIENCE

WEB DEVELOPER- (INTERN)

Trigonal Technology, Kathmandu
Jun 2024 - Jul 2024

WEB DEVELOPER (INTERN)

Dralion Construction, Bhutan
April 2022 - May 2022

PROJECTS

- **Blogger**

A blog app written in Django, a Python web framework. It has functionality like creating, editing, and deleting a blog, where as a viewer or reader can leave comments on it. It uses proper authentication and authorization of users ensuring privacy and consistency.

- **Play It:**

An Android app with basic functionality of playing a song from a local device, changing a song back and forth, and skipping.

- **Admin Panel**

An admin panel for a dynamic website with a backend written in Express.js, and a frontend with HTML, CSS, and JS with proper authentication and authorization.
